DECISION PATH Strategy: Broadcom | System programmer: Alex - z/OS tools | Ingesting team: Application Development

2026-2027 | Endevor → IBM DevOps | Normal operations | Required Endevor upgrade

Normal operations work required to remain supported before the replacement is ready. Owner: Alex. Consumer: Application Development.

2026.5-2027.5 | Endevor → IBM DevOps | Install / configure | Install + configure IBM

System Programming installs and configures the IBM replacement and establishes the initial environments.

2027.25-2029.5 | Endevor → IBM DevOps | Team ingestion | AppDev ingestion · 35%

Application Development onboards pipelines, operating procedures, and support responsibilities. Current illustrative conversion progress: 35%.

Decision at 2029.5 | Endevor → IBM DevOps | Operational impact | Endevor change freeze

Avoid nonessential Endevor changes while final workloads move to the IBM platform.

Decision at 2030.5 | Endevor → IBM DevOps | Decision / exit gate | Retire Endevor

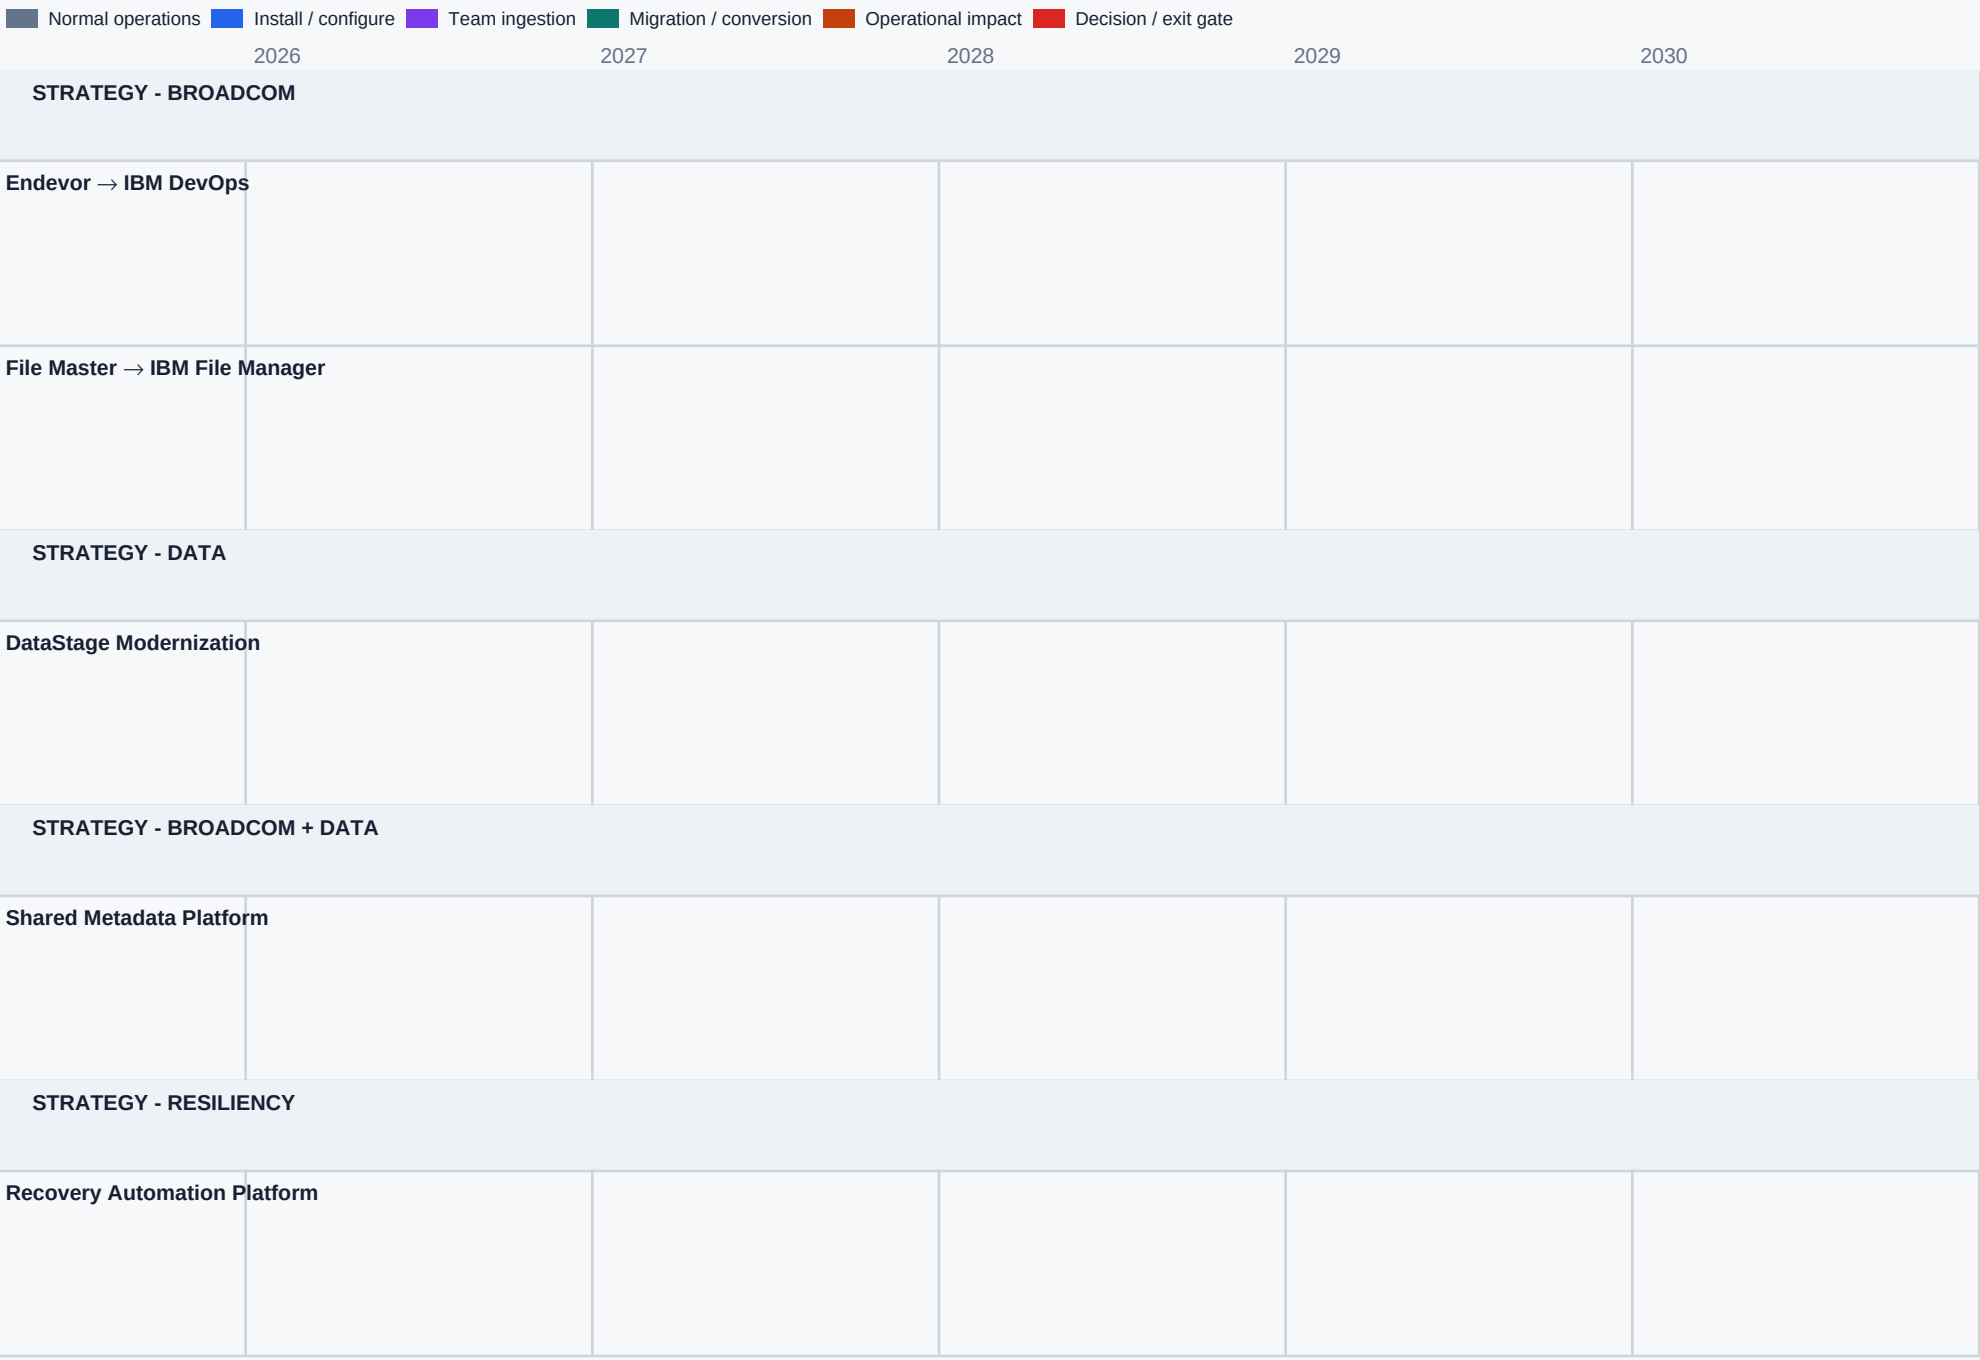

Exit gate before the current contract ends.

Written flow for the decision path shown above.

DECISION PATH Strategy: Broadcom | System programmer: Alex - z/OS tools | Ingesting team: Enterprise Operations

- **2026.25-2026.75 | File Master → IBM File Manager | Normal operations | Maintenance patch**
  Routine maintenance that competes with replacement engineering capacity.
- **2027-2028 | File Master → IBM File Manager | Install / configure | Build IBM File Manager**
  Install, security integration, configuration, and operational readiness.
- **2028-2029.5 | File Master → IBM File Manager | Team ingestion | Operations ingestion · 60%**
  Enterprise Operations adopts the platform. Illustrative progress: 60%.

DECISION PATH Strategy: Broadcom + Data | System programmer: Jordan - data platforms | Ingesting team: Application Development

2026-2028 | Shared Metadata Platform | Normal operations | Current tooling updates

Normal updates shared by the Broadcom and Data strategies.

2027-2029 | Shared Metadata Platform | Install / configure | Joint platform build

Joint dependency: configuration must satisfy both application delivery and data governance requirements.

2028.5-2030.5 | Shared Metadata Platform | Team ingestion | Joint ingestion · 10%

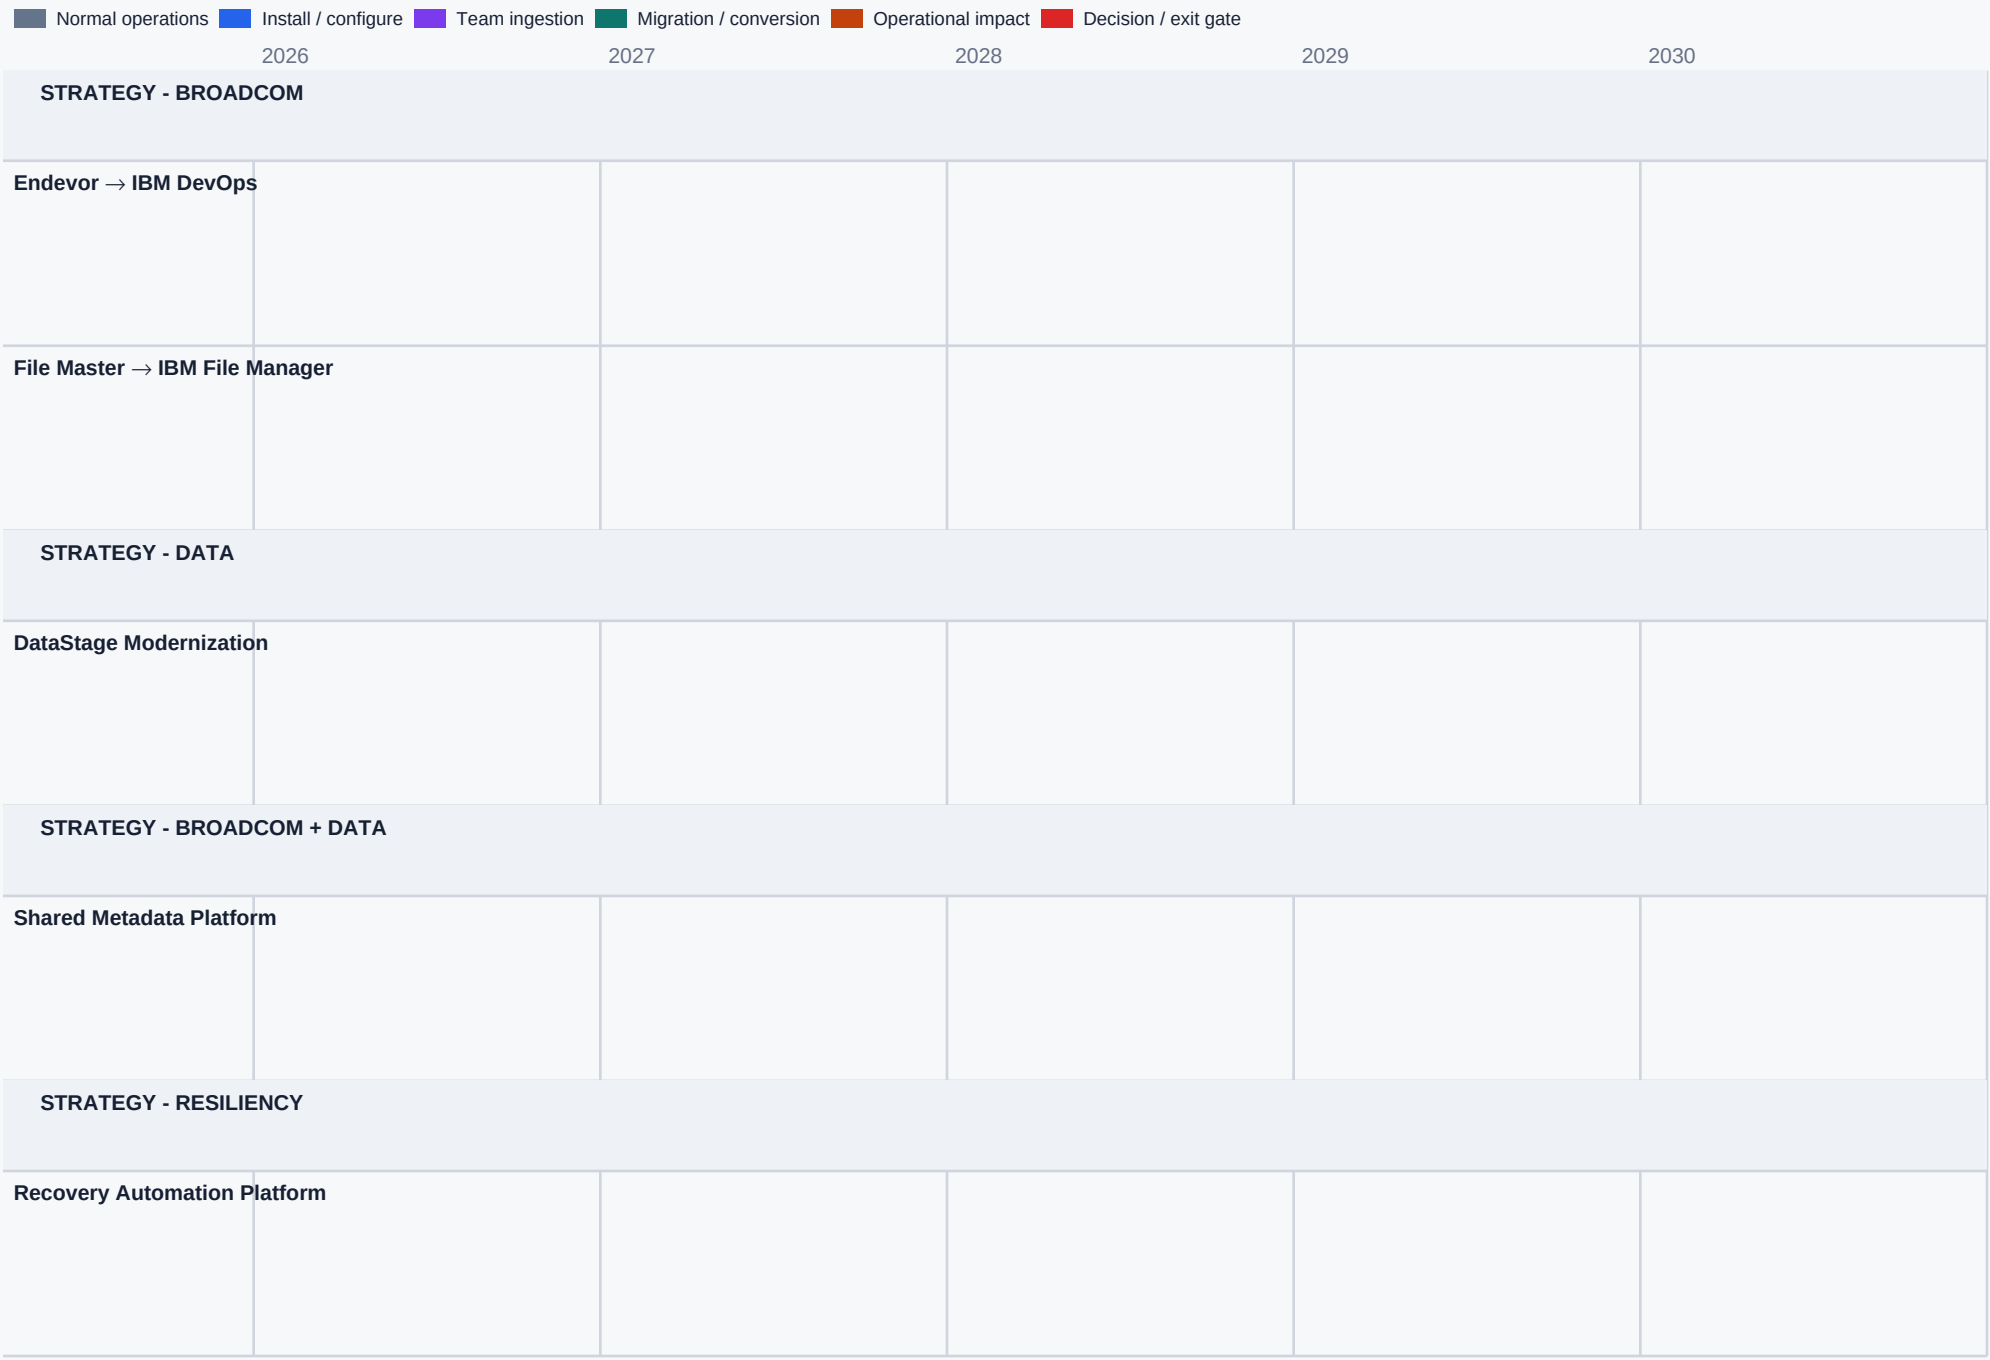

Application Development leads initial ingestion with Data participation. Illustrative progress: 10%.

Written flow for the decision path shown above.

DECISION PATH Strategy: Resiliency | System programmer: Morgan - resiliency | Ingesting team: Enterprise Operations

2026.5-2027.25 | Recovery Automation Platform | Normal operations | Current release update
Mandatory update to preserve vendor support and recovery readiness.

2027-2028.5 | Recovery Automation Platform | Install / configure | Configure automation
Morgan configures automation, access, monitoring, and recovery integrations.

2028-2029.75 | Recovery Automation Platform | Team ingestion | Operations ingestion · 45%
Enterprise Operations adopts procedures, exercises, and support. Illustrative progress: 45%.

Decision at 2029.75 | Recovery Automation Platform | Decision / exit gate | Recovery exercise
Formal readiness gate before declaring the ingestion complete.

Written flow for the decision path shown above.
